Winning Free For All Trot Championship-Dudie Archdale a Close Second-Annie Kohl Takes Professional Drivers Stakes-Shawbrav Winner of 2.12 Trot in Straight Heats

Plitisburg. Aug. 8.—The final in the Professional Drivers' stake, 2.15 trot, the two preliminaries of which were run on the opening day; and the free for all trot champlonship, furnished the thrillers for the fourth day of the Pitisburg meet on the Grand Circuit. The latter brought out the big fellows, although not in such numbers as had been expected. Billy Burke, the horse that made the season's track record at Cleveland on August 1, stepping in 2.94 2-4, was the center of comment and admiration, with Dudie Archdale, one of the Geers string, sharing the honors. Billy Burke took the two heats of this race. Incidentally, another son of Silent Brook, won another race on today's card, the 2.12 trot, which Shawbay took easily. In the next heat Annie Kohl got the lead at the start and held it to the finish, having a driving race of t, with Dorsh Medium in the stretch and cetting first money. Shawbay took the 2.12 trot in three straight heats, running away from the field in every heat, with apparently no effort. In the last heat Murray endeavored to hold him down, having the race won, but the stallion kept letting out and made the mile in 2.67-1-4. Freed Jamisson with the brown golding, Eather also, had an easy time. geiding Babe siso had an easy time in the 2.09 pace, taking it in straight beads. Jamison got away among the last every time, but ran his race almost entirely in the stratch.

New York, Aug. 8.—The course of he stock market today, while at first nclined to a higher level, was more than ordinarily confusing, the move-ment jumping from one group to an-other, with alternate periods of strength and irregularity. Sudden braking is harmful to tires. It causes the wheels to be dragged over the ground with the result that the tire treads are quickly worn away. Occasionally motorists apply their brakes so forcibly that the wheels are locked. Not only is this absolutely rulnous to envelopes, but it is not generally the quickest way to stop a car. A demonstration of the same principle is often seen in starting a railroad train. If the throttle is opened suddenly the wheels of the locomotive will spin around without gripting the rails and the train stands. ping the rails and the train stands still, whereas if the steam be applied slowly the cars are set in motion at
